SAVE OUR PLANET

# ZERO WASTE

## PROGRAM

REDUCE THE WASTE PRODUCTION OF YOUR BUSINESS  
WITH OUR ZERO WASTE PROJECT

**5,9 MILLION LITRES / YEAR**  
5,9 million litres of cleaning products end up in the aquatic environment caused by the catering industry. That's why it is important to use 100% biodegradable cleaning products.

[ f á k ]

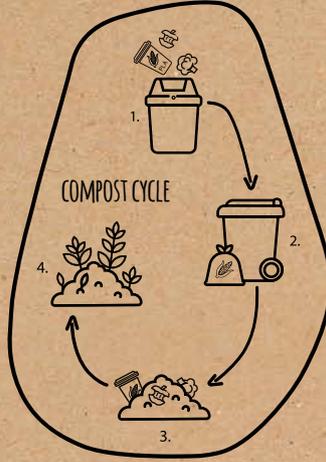

[ j u h ]

[ p l a s z t i k ]

*the cycle is complete*

*cheer up and fill-up with us!*

DON'T FORGET: WE TAKE BACK THE EMPTY BOTTLES / PACKAGING BOUGHT FROM US, AND RECYCLE OR COMPOST THEM FOR YOU. IF YOU BRING IT BACK TO US, WE GIVE YOU A 5% DISCOUNT ON YOUR NEW BOTTLED PRODUCT.

RINSE YOUR EMPTY BOTTLES AT HOME, AND WE REFILL THEM FOR YOU IN THE QUANTITIES OF 0,5 LITRES OR 1 LITRES.

# bi·box

*the organic packaging*

LOOK FOR THE BI · BOX EXTREMELY SUSTAINABLE, COMPOSTABLE SINGLE-USE PRODUCTS!

*Team bi·box*

*Bioplastics.  
for the Earth not to suck.*

cleaneco

That's us!

Why did it become 'natural' that with our daily routine we pollute our environment?

Why wouldn't it be possible that our homes and businesses are sustainable and environmental footprint free?

What is

**cleaneco** ?

The possibility to choose!

Environmental friendly cleaning products in biodegradable packaging, without any compromise, at affordable prices.

## THE IDEA

We started to collect data about international researches, methods and regulations existing in the case of producing environmentally friendly cleaning products in the EU.

2011

*We were just reading, googling and reading and googling.*

www.

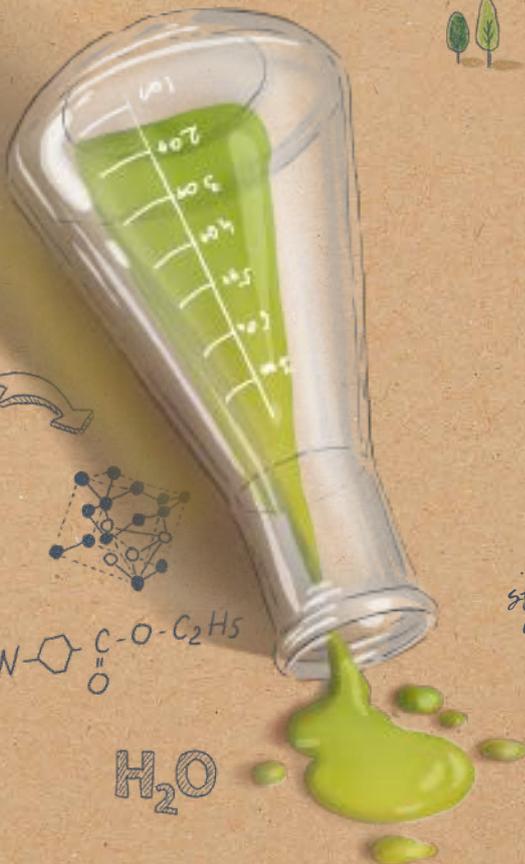

## BEGINNING

Our startup enterprise started from a garage. We set out to the market with 10 self-developed environmentally friendly industrial cleaning products.

2012

*So typical that every big dreamer startup comes from a garage...*

## LABORATORY

At this time we had a continuous product development programme working from our own laboratory.

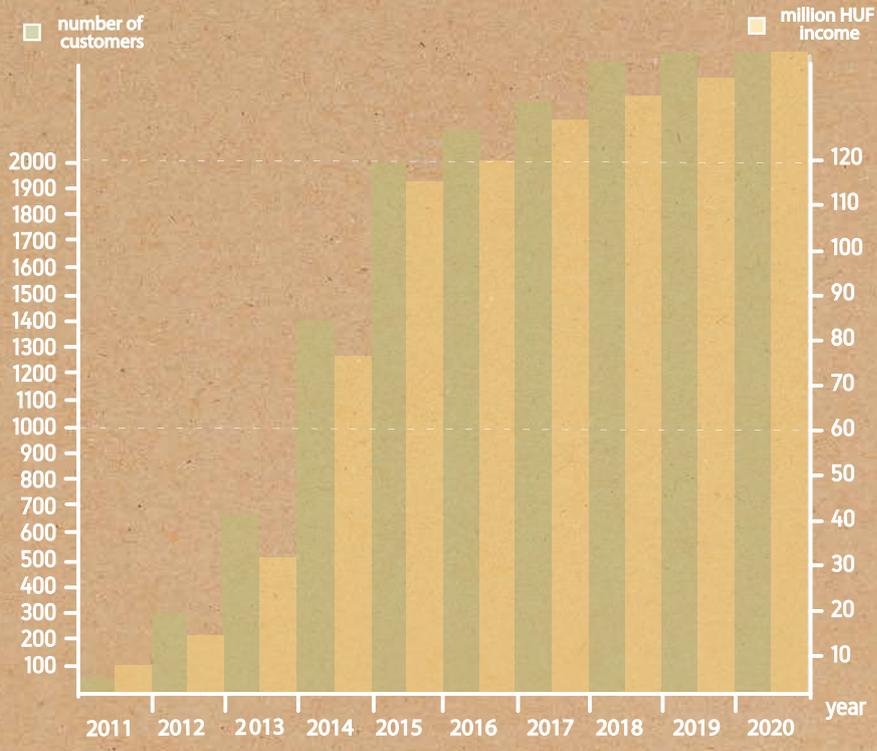

2014

*... Here, we might had started to understand what we were doing.*

$(C_3H_4O_2)_n$

*We grew and multiplied.  
2021*

## THE CONSTRUCTION

We started to build our own factory at 2000m<sup>2</sup>

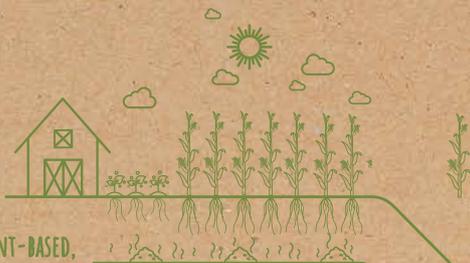

*with our own hands!*

**2015**

WE COLLECTED 100% PLANT-BASED, HYPOALLERGENIC INGREDIENTS.

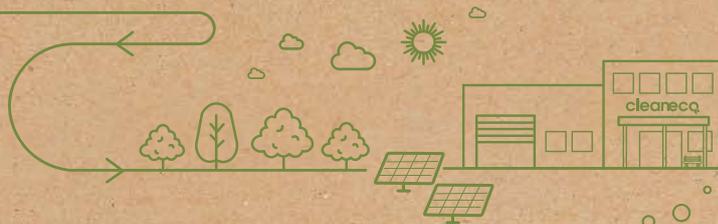

INGREDIENTS WITH TRADEMARKS OF ORIGINATING FROM SUSTAINABLE FARMING

OUR OWN RESEARCH AND DEVELOPMENT USES THE MOST INNOVATIVE RAW MATERIALS AVAILABLE WORLDWIDE. THE PRODUCTION IS CRUELTY-FREE.

THE PRODUCTION PROCESSES ARE EXECUTED IN QUALITY ENVIRONMENT ASSURED BY ISO, USING SOLAR ENERGY.

THE MATERIAL OF THE LABELS IS BIOPE/PEPE AND THE 100% COMPOSTABLE NATUREFLEX.

THE BOTTLES ARE RECYCLED REHDPE OR MADE FROM 100% COMPOSTABLE PLA INGREDIENTS.

*Our circular economy model*

*This is how we are with the numbers nowadays*

# 124 TYPES OF SELF-DEVELOPED PRODUCTS IN TWO PRODUCT LINES

cleaneco  
*Home*

cleaneco  
PROFESSIONAL

*For your home*

*for your business*

## DEGRADABLE PACKAGING

We weren't satisfied with the fact that the chemicals won't pollute the Earth where we live. We started our plastic research programme, with the aim of making a 100% biodegradable packaging for our products. What we have imagined is more than just a new packaging material...

2016

*... For the first time in 2012 there was a publication claiming that engineers developed a biodegradable biopolymer produced from corn, from which they could create a 3x3 cm transparent tab, which was optically matched with the plastic of water bottles.*

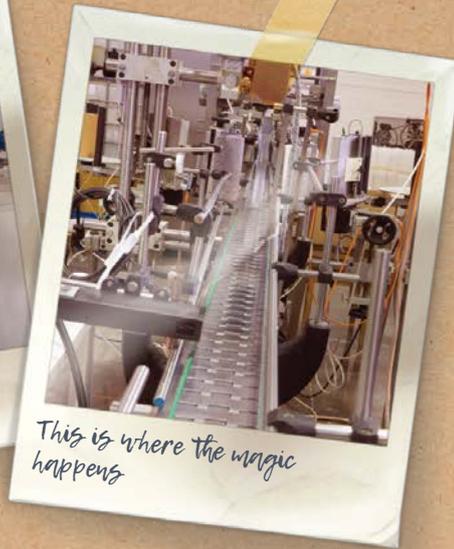

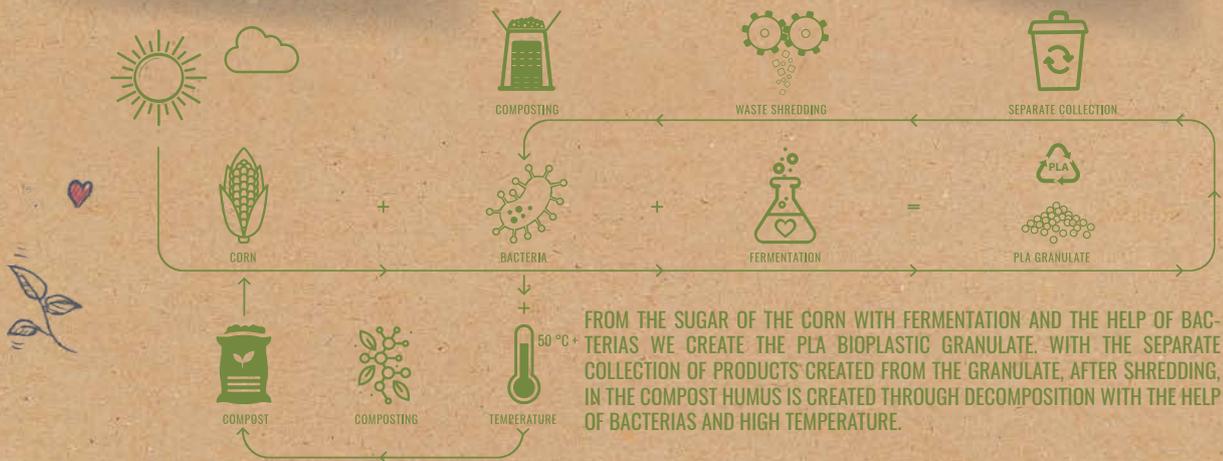

We love the sun :)

Mixing and mingling

This is where the magic happens

OUR AIM IS CREATING A FULL CYCLE

## ORGANIC INSIDE OUTSIDE

By 2020 we were making sustainable hygienic deliveries to 2200 business partners. Besides that, we started to develop our household trading branch, with biodegradable packaging.

2020

eco

100% ORGANIC

most precious thing  
in our hearts

eco  
 $(C_3H_4O_2)_n$

Besides our more than 120 products, we have a complete single-use product line thanks to our bioplastic and PLA researches

We are delighted by the trust of plenty businesses and households that we obtained by hard work throughout the years. We will continue to work on keeping your precious trust. With your help together we can grow and make crucial steps towards protecting our planet.

# loofee

PLASTIC-FREE TOOLS

made from Loofah Plant by  
bibo

The loofah sponges are made from the loofah plant's fruit, which is the inside part of the loofah sponge. It is a fast growing and sustainable plant. Inside the fruit a dense grid of fibres is formed. Our Loofee products are handmade in the manufactory. As it is a fruit, the colour and the size of the luffa sponge may change, sometimes it might contain seeds.

Why should you choose the **loofee** luffa sponge?

vegan • plastic-free • biodegradable  
LONG LASTING PLANT SPONGE MADE FROM LOOFAH

The perfect alternative for plastic sponges

Handmade products. Sizes around 8-12x15 cm. Swells to multiple of its size when soaked in water, its fibres soften become sponge-like. After usage, rinse through, wring it and hang up to dry. You can clean it in the washing machine, dishwasher or with hot water. Very persistent, with proper usage you can use it for months. After it has deteriorated, you can compost the sponge, it degrades in the environment.

Ingredients: 100% loofah plant fruit (Luffa aegyptiaca, Luffa cylindrica peeled, seeded out, dried), cotton string.

#### FRUIT AND VEGETABLE WASHING LUFFA SPONGE

Ideal for cleaning hard-shelled vegetables, fruits. Use it on the wet peel of the vegetables and fruits with gentle rubbing to remove any contamination.

#### LUFFA SPONGE FOR DISHWASHING

Use it on any surface while washing the dishes, it is scratch-free thanks to its softened fibres.

#### LUFFA SPONGE FOR CLEANING

Recommended for cleaning washbasins, bathtubs, tiles, taps and worktops. Use it with warm water paired with natural cleaning products!

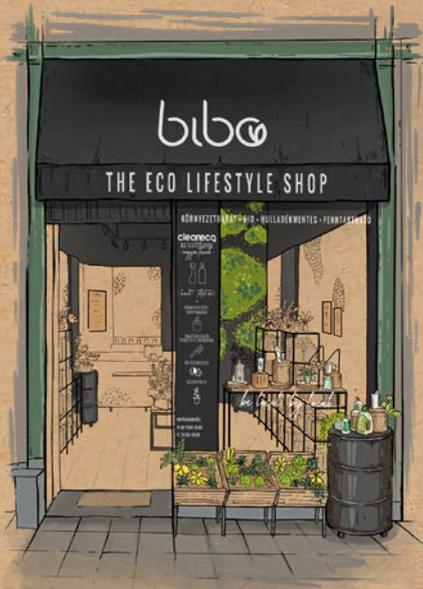

#### LUFFA SPONGE FOR SHOWER AND BATH

Can be used everyday during your daily personal hygienic routine, while showering or having a bath, when softened by water with a small amount of soap or shower gel.
